

BeechTek™

These unique table tops combine the sustainability, beauty, strength, and durability of European Beech with the technology of a precisely engineered product. Our BeechTek™ tables are composed of lumber harvested from sustainably managed forests. The table tops achieve their distinctive striated appearance through numerous layers of Beech bonded by Phenolic Resin Adhesives which also offer exceptional strength.

The table tops are finished in a 14-step process utilizing a catalyzed conversion varnish sealer and top coat. Conversion varnish offers superior moisture resistance, cleaner / chemical resistance and additional surface strength. The coating includes an anti-microbial agent as well as a UV Inhibitor.

BeechTek™ has been tested to withstand up to 24 hour exposure to:

- Coffee
- Detergent
- Grape Juice
- Ketchup
- Lemon
- Olive Oil
- Orange Juice
- Vinegar
- Water
- 100% Alcohol
